

Dear Lt. Governor Wasinger,

I have lived in the United States for four and a half years. Before that, I lived in Mexico and Brazil. After different cultures I can say that America is awesome. America has resources and experiences that are out of this world. The opportunities of school, sports, and extracurricular activities are impressive since there are lots of help from the government to help people go to a higher level. I love the security that kids can go and play or go buy food at the supermarket without an adult grabbing them by the hand. America is like a magnet attracting people from other countries and cultures creating bonds like no other. The sports in America are the best, except for soccer, with players like LeBron, Curry, Aaron Judge, Tom Brady and lots more.

I love America because I have freedom. I can be whatever I want, I have the freedom of religion and I get lots of opportunities in everything. For me, it is impressive how small towns of 40,000 people have top-tier stores including Target, Walmart, and Sam's Club. That is something that not many countries in

in the world would have but America does.
I love America because of the freedom I have.

God Bless America,

Matias Fuente Mondragon.
